SCOPE AND CONTENT NOTE

THE MISCELLANEOUS MATERIALS COLLECTION

This collection is a compilation of papers of individual persons or organizations which were too small in volume to be accessioned separately. The Petr Mikhailov papers contain the oldest materials, dating from the second half of the 19th century, although the Agapii Goncharenko collection, consisting primarily of later clippings, also refers to this period, Goncharenko being a pioneer of the Russian-language press in America. Most of the papers are of a biographical or genealogical nature, although there is also a folder of documents relating to the Society of Russian Engineers and Technicians on the Island of Cyprus (Obshchestvo russkikh inzhenerov i tekhnikov na o. Kipr).

Detailed processing and preservation microfilming for these materials were made possible by a generous grant from the National Endowment for the Humanities and by matching funds from the Hoover Institution and Museum of Russian Culture. The grant also provides depositing a microfilm copy in the Hoover Institution Archives. The original materials and copyright to them (with some exceptions) are the property of the Museum of Russian Culture, San Francisco. A transfer table indicating corresponding box and reel numbers is appended to this register.

The Hoover Institution assumes all responsibility for notifying users that they must comply with the copyright law of the United States (Title 17 United States Code) and Hoover Rules for the Use and Reproduction of Archival Materials.
